TECH TALKS

How to work smarter, safer and more efficiently with technology

How safe is your identity?

We all love and hate technology. Our phones and our computers have simplified our lives in so many ways. The sophistication of technology today is truly amazing. However, managing all of our personal emails, texts, passwords, advertisements, pop-ups, internet browsers and the like can be overwhelming.

Did you know there is a \$10B global fraud industry out there which is constantly inventing ways to outwit you and your computer/phone software?

*As part of our **CHOICES** programming, please join us on **Tuesday, September 13** for the first in a series of talks on how to safely use today's technology in our lives. Jamey Mellis, the President and CEO of Software Solutions and Design in Charleston, will talk to us about phishing, key loggers and malware. He will provide practical ideas and strategies to work smarter, safer, and more efficiently with technology.*

Don't miss out!

We've had a great response and there are only 6 places left for this Thursday's **Behind the Scenes Tour of the South Carolina Aquarium**.

Sign up and join Don Higgins, IAH Member and Aquarium Board Member, for an insider's look into this amazing organization. The tour will include the Zucker Family Sea Turtle Recovery facility, The Great Ocean Tank and time to roam other exhibits following the guided tour. Hope to see you there.

Below find a sample of upcoming activities that are available to you.

Click on the **Blue Bar** at the bottom of this Weekly Update for event details and sign up information. We look forward to seeing you.
